

FIG. 1

Comparison of Typical "Three Chromatography Step" Protein Purification Processes With and Without Mobile Phase Polymer

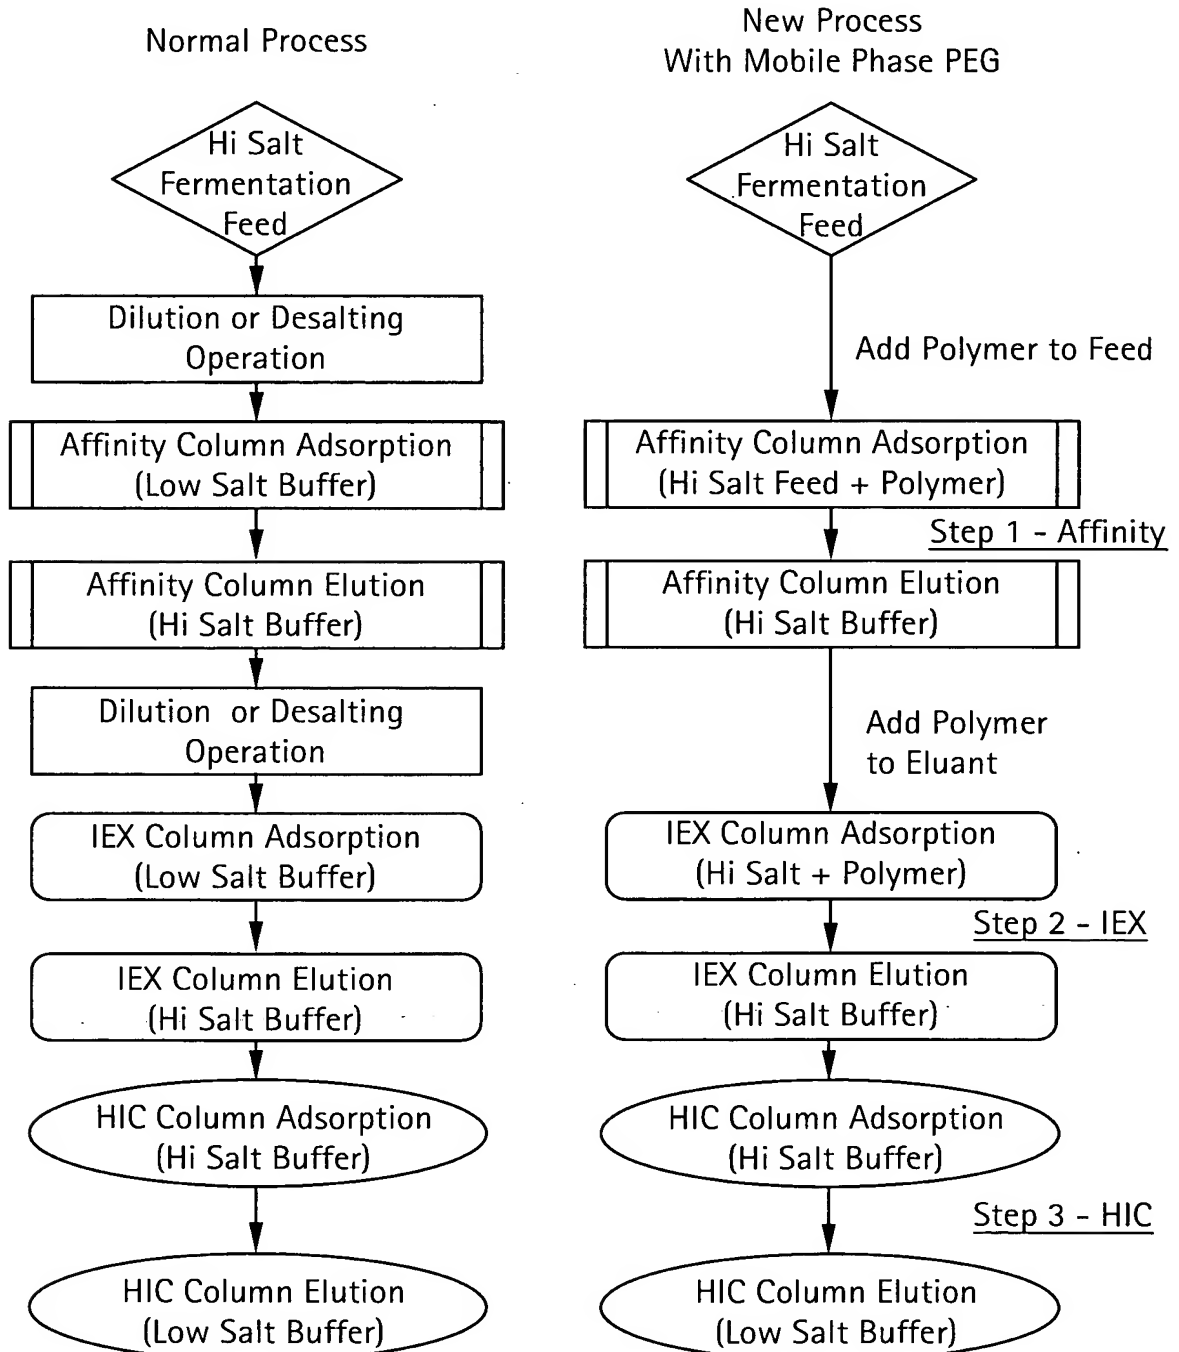

FIG. 2

Comparison of Typical "Three Chromatography Step" Protein Purification Processes With and Without Mobile Phase Polymer

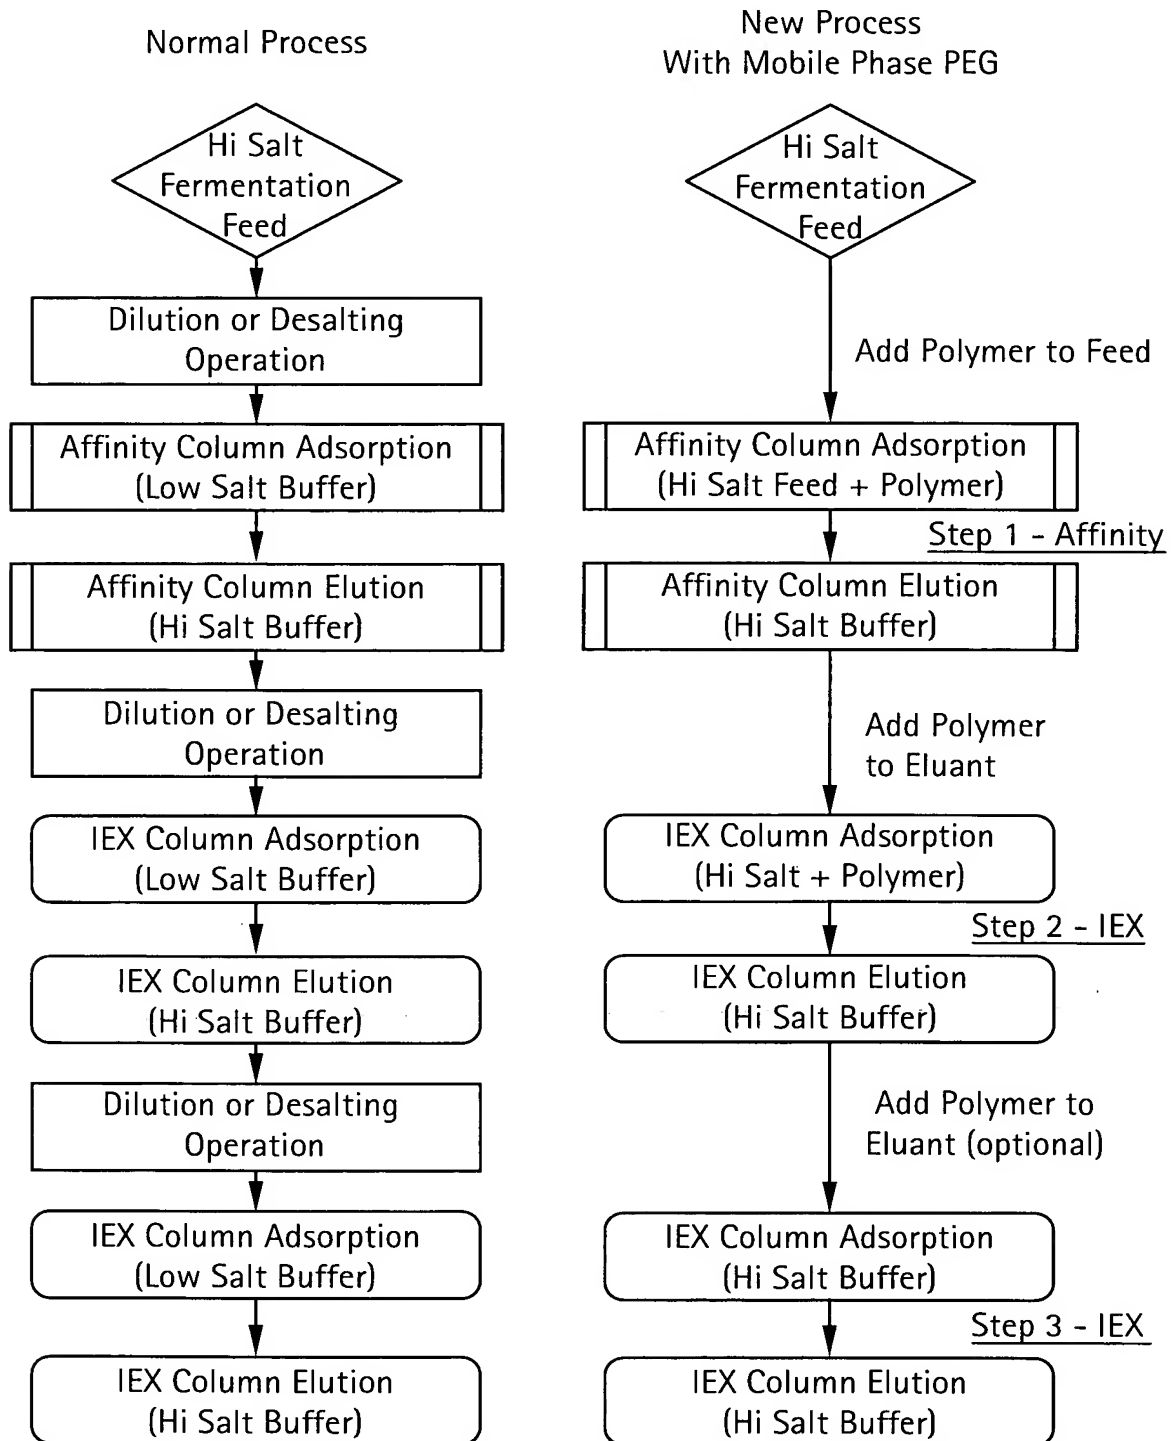

FIG. 3

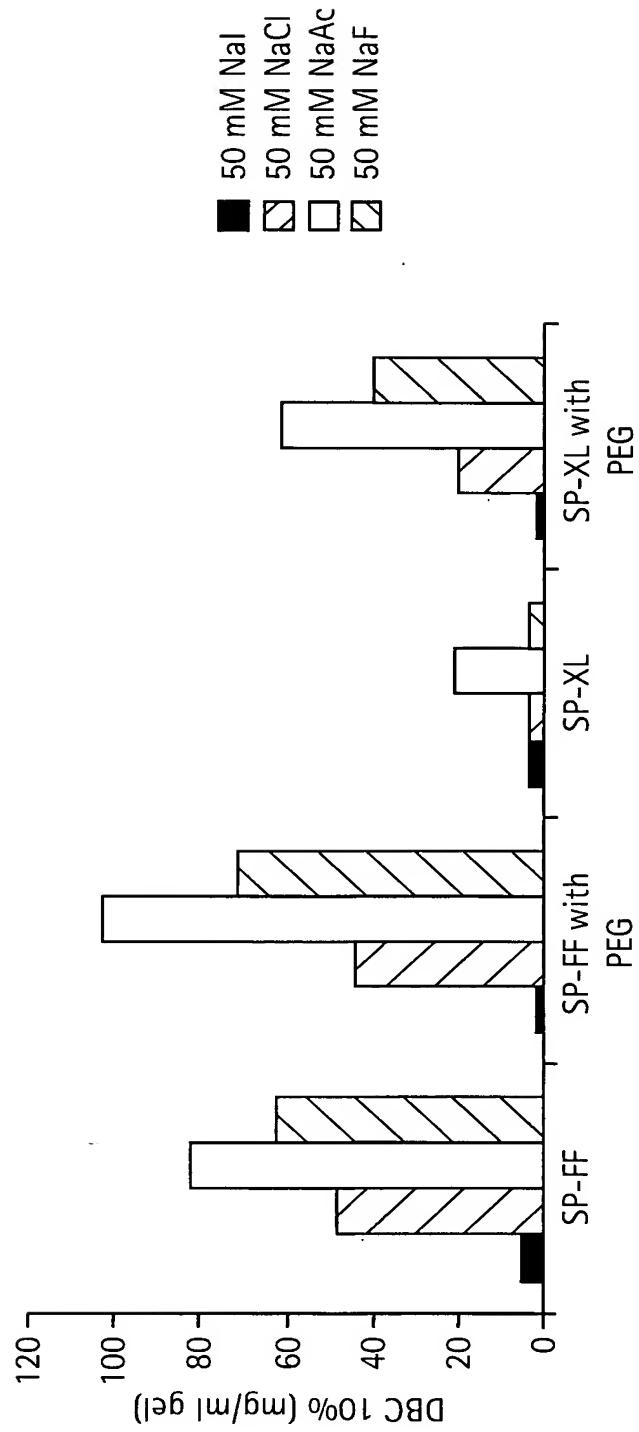

FIG. 4

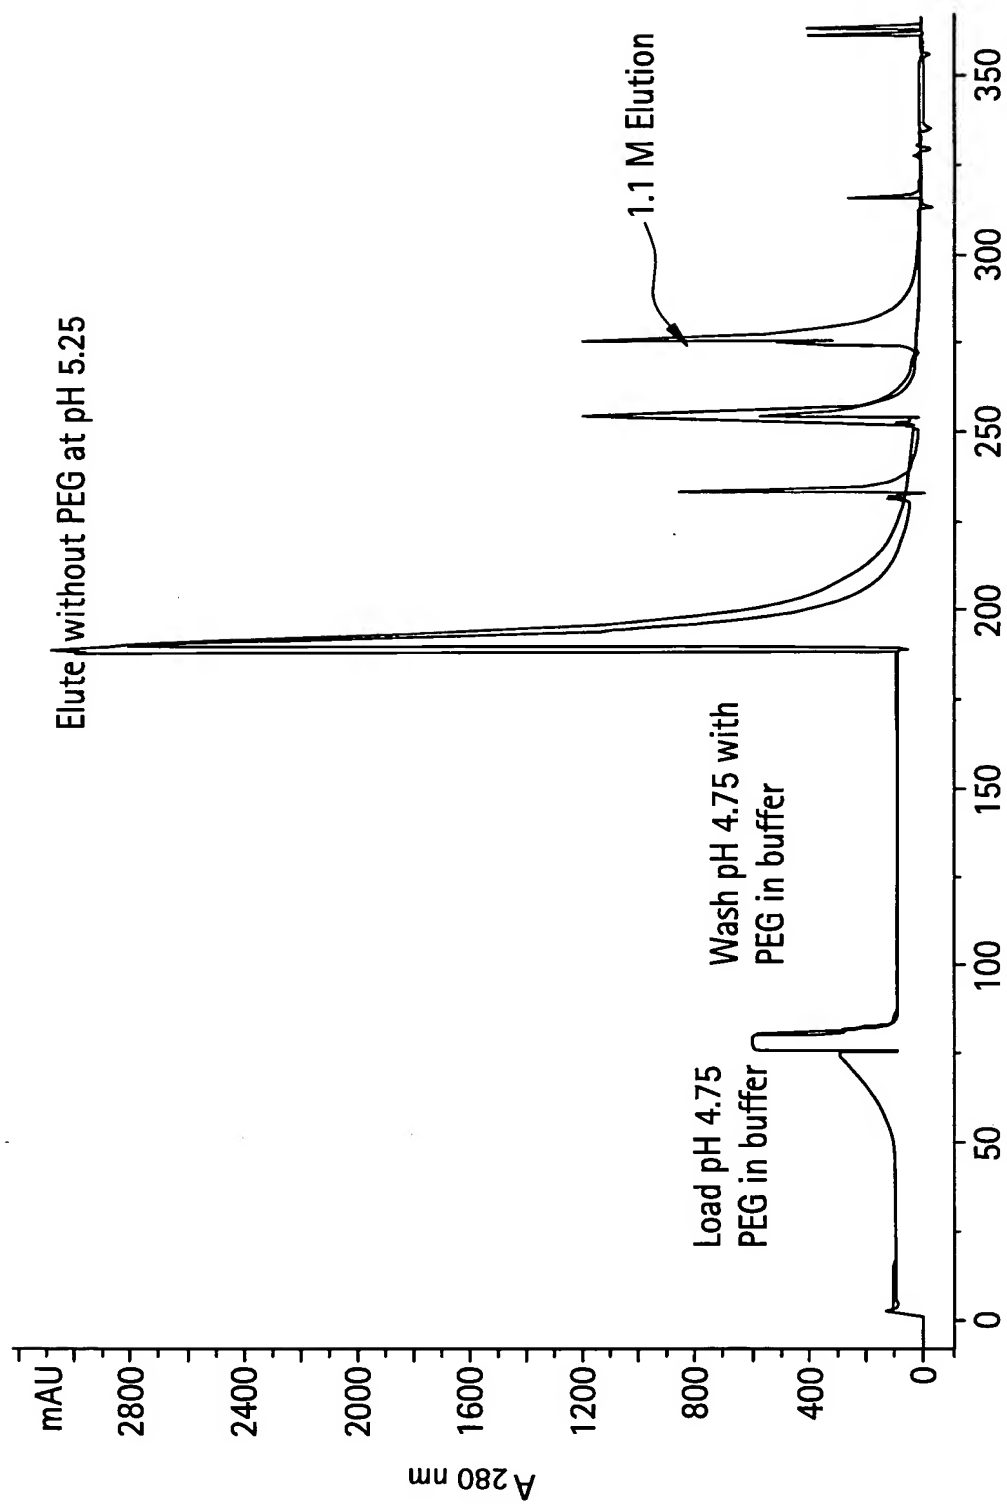

FIG. 5

Effect of [PEG 10] on BSA QB10% to SPXL
110 mM NaAc, pH 4.75, BSA 4mg/ml

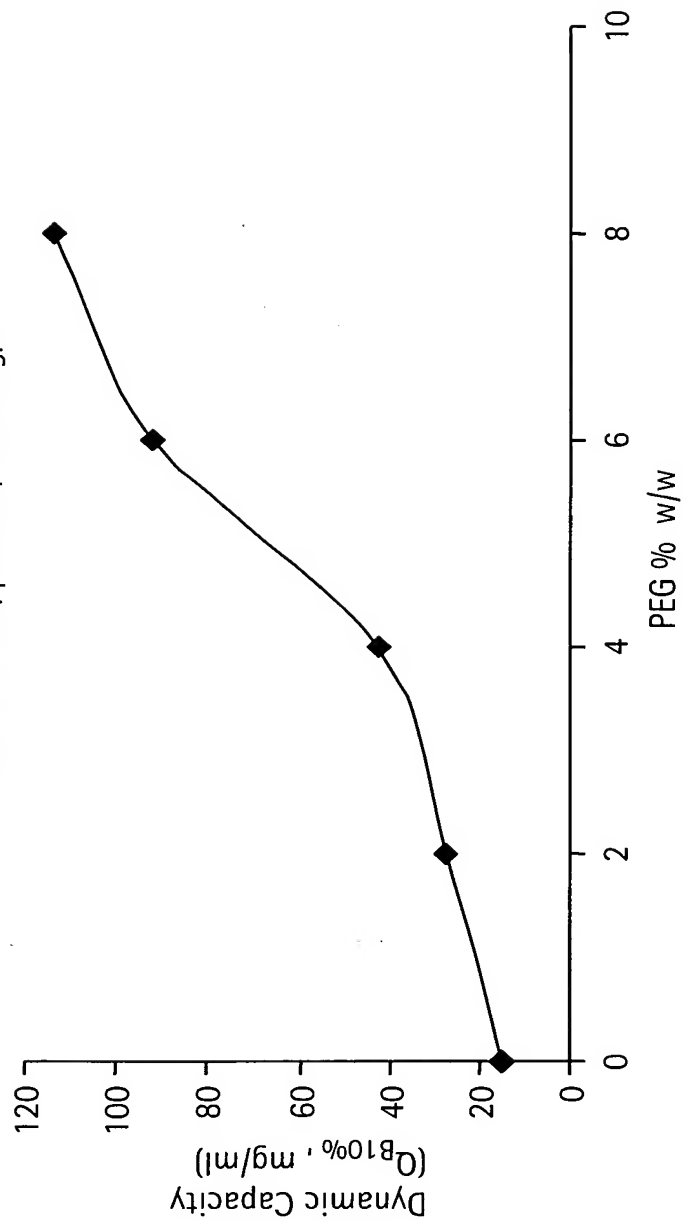

FIG. 6

Effect of 8% PEG 8000 on QB10% for SP-XL
at 110 mM NaAc, pH 4.75
